

Company Information, Growth & Mission

About GSB Digital

GSB Digital is an award winning print service provider in the New York City area. Offering a spectrum of print applications from innovative digital printing to traditional engraving and letterpress, GSB Digital produces attractive end products for many industries. Whether you're in need of managed document services, corporate marketing materials or high-value short-run packaging, GSB Digital is focused on helping clients achieve success through print.

Established 29 years ago, we've been privileged to service some of America's most demanding clients. Our keen understanding of client's expectations and the urgency behind their print requests paired with our passion and state-of-the-art technology is why we state that we produce print you're proud of. We offer sophisticated technologies and techniques that make your print communications unique.

GSB Digital strives daily to provide quality, efficiency, value, and versatility. Over the years we've established a highly skilled, passionate organization that successfully completes projects ranging from a single printed sheet to complex installs with equally complex schedules. Our solutions allow us to efficiently and accurately manage jobs from concept to fulfillment, saving our clients time and money.

Our Growth

In 2013, we moved our headquarters to a 20k square foot facility in queens. We increased our in-house capacity with a digital die cutting machine and wide format flatbed

printer, Since then we have added additional print technologies like our Scodix digital embellishment press and have expanded our fulfillment area to accommodate national pack out services. We believe by staying at the forefront of new technologies like these we can pass on the benefits to our clients.

In December of 2018, we acquired the assets and staff of Aldine Printing, Inc and expanded our operations with traditional printing capabilities. These include historic letterpress, engraving, foil stamping, die cutting, embossing/debossing, thermography and two-color offset printing.

In January of 2020, we again relocated to an even larger 30k square foot facility where we continue to grow. In this new location, we strive to carry out our mission to bring passion and innovation together through modern processes and the traditional craftsmanship of print.

Our Professional Experience

GSB Digital is comprised of a superior team that is passionate about their work. Dedicated and responsive, our staff is producing some of the finest publications and response-driven marketing materials in the market. When working with us, you will be assigned a dedicated customer service representative (CSR) that will service your job from estimate origination all the way through shipping your finished printed materials. GSB Digital regards these measures as their highest priority. Additionally, your CSR's responsibilities include: estimating, job tracking, press okays, and final quality control.
